

Press Release

Nivelles, April 16, 2018

HMS received the ISO27001 Certification for eWON® Talk2M

HMS Industrial Networks has obtained ISO 27001 Certification for eWON Talk2M, its award-winning cloud connectivity platform. The ISO 27001 Certification is the international standard that describes best practices for an information security management system (ISMS).

Compliance with the ISO 27001 certification validates that HMS Industrial Networks has implemented comprehensive information security practices to protect their users, their information, and their data in accordance with internationally recognized standards.

The ISO 27001 certification includes the Talk2M infrastructure, data centers and services. HMS Industrial Networks underwent an in-depth assessment by a third-party auditor to validate compliance with the standard. Security has always been a top priority for HMS, and this ISO27001 certification is yet another proof of the company's effective security program.

"We're proud to be internationally recognized as a leader in information security solutions and best practices for the Industrial Internet of Things, IIoT. Through ISO 27001 and other certifications, we continue to ensure that our security controls and practices follow internationally-recognized security standards." says eWON Talk2M Security Manager Geoffrey Gobert and continues; "Data security is critical when dealing with IIoT, and this ISO certification provides our users with the highest level of protection for their most sensitive information."

On the organizational side, HMS Industrial Networks ensures the highest level of attention to security and compliance matters by dedicating staff for continuous prevention and monitoring of security threats, as well as managing strict policies around escalation and rapid response.
